

# LESSON PLAN

## Creative Development

### Early Learning goals

- Use the creative arts such as drawing, painting, storytelling, etc to express ideas and make meaning (EYLF 5.3). Use ICT as a tool for drawing (EYLF 5.5)

### Activity

Create or download pictures from the Internet that were made produced by a computer. Discuss the features of the pictures and how they are different from pictures using traditional methods. Present the artwork using a projector. Encourage the children to look for the different ICT techniques and to suggest which tools have been used.

### Extension

Use these questions to prompt discussion: "How do we know that the pictures have been produced using ICT?"; "How are the colours, lines etc different to pictures using non-ICT methods?"; "Are there some things that we can/cannot do using a painting program that can/cannot be done traditionally?"

### ICT Resources

- Computer
- Drawing and painting program like Paint 3D or something similar.
- Presentation program like MS PowerPoint or a digital program similar.
- Digital projector.

### ICT Levels of Differentiation

Software program -

- To be able to complete the program with support.
- To ask for specific software title.
- To be able to complete program unaided.

### Teacher Learning Needs (what do you need to know?)

Learn how to teach ICT concepts to preschoolers.
